Heat-Zone

Location under TV-screen

It is NOT recommended to place TV-screens or valuable paintings over the fireplace as the rising hot air can damage the materials.

If you decide to use a construction containing a TV-screen over the bio fireplace, the following instructions must be followed, otherwise please consult your retailer or DecoFlame.

It is imperative to follow the indications in the User's Manual concerning the installation of decorative or electronic items above the fireplace.

INSTALLATION

Step 1: Make sure that the dimensions of the cut-out correspond to the measurements indicated in the technical drawing received with your fireplace. *Everything must be in level.*

Step 2: Recess the fireplace into the wall cut-out according to the indications in the User's Manual.

Step 3: Place the glass screen/s according to the indications in the User's Manual.

Step 4: Fill in the right amount of bioethanol and ignite the bioethanol with a long fireplace lighter.

The fireplace can be adjusted slightly; use the provided closure tool and push the slider either back or forward, depending on whether smaller or larger flames are desired.

Enjoy your fire.

FEATURES

- Decoflame manual brushed stainless steel burner
- 8mm aluminium casing and baseplate
- Powder-coated black fine structure
- Manually adjustable flame level
- Safety Chamber
- No chimney required

OPTIONAL

- Made-to-measure

Glass shield

Decoflame strongly recommends installing glass shields in order to protect the flame from draught, while keeping it vivid.

Model A comes with one low glass.

Model B comes with either two low glasses or one full glass and one low glass.

Model C - E can be ordered with low glass. We recommend it as illustrated for the best result regarding design and operation.
